

FOR IMMEDIATE RELEASE

Sapio Sciences Announces Exemplar LIMS Web Client 1.0 with Support for iPad and Android Tablets

Baltimore, MD – August 3, 2011 – Sapio Sciences is pleased to announce the release of Exemplar LIMS Web Client 1.0. Exemplar LIMS is a highly configurable Laboratory Information Management System, Electronic Lab Notebook and Scientific Data Management solution. Exemplar is rapidly configurable to each specific lab's requirements, and presents a clean and intuitive user interface experience for LIMS users. Exemplar LIMS core interface is a cross platform Java based client that is the result of years of human engineering experience to ensure that, even though Exemplar's capabilities continue to be extended and encompass other product domains, its ease of use and intuitiveness of operation remain intact.

With this new announcement, Sapio is extending the reach of the LIMS to browser based devices outside the network boundaries via secure access to LIMS data. The web client follows the same principles of design that exist in the Java client for a consistent end user experience regardless of how they are accessing the LIMS.

Exemplar LIMS Web Client 1.0 can be used in most modern browsers including:

- Internet Explorer
- Firefox
- Chrome
- Safari

Sapio has also certified the device on the iPad 2 and Android tablets, so now LIMS data can be accessed not only outside an organizations network, but also on these new devices.

About Sapio Sciences Llc

Sapio Sciences is a leading provider of LIMS and Data Management software, enabling scientists to manage samples, protocols, assay data and clinical trials. Exemplar LIMS breaks new ground in its breadth of functionality and ease of configuration. With built-in Sample Management, Electronic Lab Notebook (ELN), scientific data management and integrated analytics, Exemplar LIMS addresses the full life cycle of samples from receipt to processing and analysis. Sapio will continue to lead in ease of use and breadth of functionality across its product line, enabling organizations to reduce costs while increasing productivity and efficiency of both laboratories and researchers alike. Sapio has strong working relationships with leading platform vendors to ensure compatibility with technology from these leading companies.
