

SELF-PACED LEARNING. VERIFIED SKILLS.

# Sapio Certified Platform Professional

Build your platform skills.  
Demonstrate them through practical assessment.

## Flexible learning. Demonstrated competency.

For customer developers, IT and support teams who need to demonstrate platform skills. Combine self-paced study with hands-on practice and expert-verified assessment - a hybrid of flexible learning and practical validation.

Approximately 20 hours | 90 days of course access

## What is included

### Curriculum at a glance

Build skills in standard, out-of-the-box Sapio functionality: platform administration, data and process configuration, Python, the Sapio REST API and webhooks through self-paced lessons and click-along tutorials.

### Expert-reviewed practical exercises

Complete required exercises in your training environment and submit eight screenshots of your work for evaluation by Sapio experts.

### Your personal training environment

Get one year of access to a personal Sapio training environment with preloaded data for hands-on practice and required exercises.

### Graded examination

Demonstrate your understanding through a graded exam. Earn the credential by meeting both exam and practical verification requirements.

### The credential

**Sapio Certified Platform Professional** - valid for two years, with renewal options available thereafter. Share your achievement on LinkedIn.

**\$500** per seat
